These days, anyone can bring an old concrete surface back to life with a few brush strokes. This is accomplished by

expertly mixing two or more types of concrete to create the shade and character you are looking for. At Civic, we specialize in bringing concrete back to life. Our concrete repair services take time and skill. The first step is to determine the type of concrete that needs replaced. Because water slows down the curing process, we inspect the existing concrete for any cracks, separation or other damage. Using a form-and-cast method, we pour a base coat, then top with other colors or stains. Our crews work with expert detailers to help us create the desired effect you are looking for. Concrete repair services in these situations are completed as quickly as possible. During a cold season, we can complete service in a day. During warmer weather, we can complete the job over several days. As a result, the job will be completed as quickly as possible. Benefits • Service will be performed at a competitive price. • High-grade concrete. •

Modern equipment, including current state-of-the-art materials. • We are experienced. • Top-quality workmanship. • Competitively priced. • We're the experts, so you can rest assured in the long term. Services Even though we're able to repair concrete, we also perform complete concrete resurfacing. This service includes complete sealcoating, plastic voids, smoothing, and skid-resisting treatments. If you're looking for something different, we're experts at that, too
