The wound healing effect of lavender (Lavandula angustifolia) is widely reported in the scientific literature; however, there is a lack of documentation on the mechanism of action of lavender. The aim of this study was to investigate the wound healing properties of lavender. A hydroalcoholic extract obtained from L. angustifolia was tested for anti-inflammatory, antioxidant and wound healing properties on a rat model of healing skin wounds. The extract showed wound healing properties in in vitro and in vivo assays of wound healing activity. The extract showed anti-inflammatory properties at 5, 10 and 20 µg/ml (46.1% ± 3.8, 61.5% ± 2.9, 77.9% ± 5.1 inhibition respectively). The extract also showed antioxidant properties at the concentration of 200 and 400 µg/ml (50.4% ± 5.3, 92.6% ± 1.6 antioxidant activity respectively). In the in vivo assay, the extract at the dose of 0.8 mg/ml significantly increased the wound closure (16% ± 1.1) and reduced the time of wound closure (38% ± 5.3) (p New York Supreme Court Justice Thomas Griesa dismissed New York state's charges of bid rigging against Argentina on Monday in what is believed to be the single largest arbitration award in history. "Under the Foreign Sovereign Immunities Act, I have no choice but to dismiss the charges," he said in a statement, referring to a law which allows similar arbitration awards to be invalidated by a court. The ruling can be overturned by an appeal court, but would not set a precedent for future international arbitration awards. The \$1.3 billion award was made in 2011 against Argentina over what Griesa believes was a plot to oust him from his job as a judge. Argentina has successfully sought the annulment of two earlier debt swaps in which the state-owned oil and utility companies Argentina No. 2, Edesur, and Edesur
